The number of total sale slots for each species will be determined by their percentage at the fair, with no less than 5 market steers to be sold. EXAMPLE: If 150 market lambs and 140 market hogs are registered at the fair, the total number of lambs and hogs would equal 290. 150 lambs out of 290 animals $150/290 = 52\%$. 140 hogs out of 290 total number $140/290 = 48\%$. This would mean that 52% (34) of the 66 sale slots would be given to lambs and 48% (32) of the 66 sale slots would be given to hogs.
